FULL STACK MVC .NET DEVELOPER

SOFTWARE PROJECTS

Responsive Portfolio Site

bit.ly/cydwebpro

- Built the user interface design, cross-browser support and full stack development life-cycle methodologies.
- Curated a unique single-page branded web presence.

Personal Developer Blog

bit.ly/cydwebblog

- Detailed the progression of my career as a developer.
- Implemented document & image uploads, rich text editor, email service and user role management.
- Incorporated 3rd party authentication to Facebook, GitHub, Google, Microsoft and LinkedIn.

Bug Tracker Site

bit.ly/cydbugtracker

- Created a fully functional MVC bug tracker web application, from scratch, implementing enhanced security, code-first database design and file uploading features.

PROFESSIONAL EXPERIENCE

Web Software Engineer

Coder Foundry | Kernersville, NC | May 2017 – Present

- Created fully functional web applications implementing enhanced security and file uploading features using SQL and the .Net MVC framework.
- Composed dynamic front-end design using partial views and AJAX integrating RESTful APIs utilizing Azure App Services.

Inside Sales Representative

Equashield, LLC | Port Washington, NY | 2016 – 2017

- Actively prospected and engaged with hospital directors and executives to market multi-million dollar cancer treatment solutions that protected healthcare professionals from chemotherapy exposure.
