SUMMARY

Software developer, possessing the skills, passion, and creativity to building scalable solutions to complex problems. I am intuitive and resourceful, with the interpersonal skills to collaborate and communicate with both technical and non-technical audiences.

DEVELOPMENT EXPERIENCE

Coder Foundry   *Kernersville, NC May 2017 – March 2018*

Immersive Full Stack Software Developer Bootcamp

•Portfolio Website: Built the user interface design, cross-browser support with full stack development life-cycle methodologies. Curated a unique single-page branded web presence.

•Blog: Developed a content management system to manage blog posts and visitor comments. Implemented login functionality utilizing ASP.NET Identity & OAuth authentication protocols.

•Issue Tracking Application: Created a fully functional bug tracker web application using .NET MVC Framework. Implemented Entity Framework code-first database with user and role-level security. MSSQL database interaction accomplished through LINQ to Entity Framework

•Windows Virtual Machine: Deployed a Windows Server on both AWS & Azure cloud services via Remote Desktop Protocols to host several MVC web apps & managed the database and Security Groups to facilitate network data transfer.
